DETAILED ACTION

Claim Status

Claims 1, 4, 5, 7-9 and 19 are rejected.

Claims 2, 3, 6, 18 and 20 are cancelled.

Claims 10-17 are withdrawn.

Terminal Disclaimer

The terminal disclaimer filed on December 19, 2011, disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application Number 10/588,016, has been reviewed and is NOT accepted.

The person who signed the terminal disclaimer is not recognized as an officer of the assignee, and he/she has not been established as being authorized to act on behalf of the assignee. See MPEP § 324.

An attorney or agent, not of record, is not authorized to sign a terminal disclaimer in the capacity as an attorney or agent acting in a representative capacity as provided by 37 CFR 1.34 (a). See 37 CFR 1.321(b) and/or (c).

Claim Objections

Claim 1 is objected to because of the following informalities:

The limitation "the lumen" in line 13 lacks antecedent basis.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an

Art Unit: 1778

invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 4, 5, 7-9, and 19 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 12, 14-16 and 18 of copending Application No. 10/588,016. Although the conflicting claims are not identical, they are not patentably distinct from each other because both disclose a hollow fiber membrane with polyelectrolyte bound in the separating layer.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

Claims 1, 4, 5, 7-9 and 19 would be allowable the double patenting rejection is overcome.

The following is a statement of reasons for the indication of allowable subject matter: Claim 1 would be allowed because the prior art of record does not show or suggest a semipermeable hollow-fiber membrane, characterized in that a polyelectrolyte with negative fixed charges is physically bound in the separating layer, characterized in that the supporting layer being essentially free

Art Unit: 1778

from polyelectrolyte with negative fixed charges, in combination with the remaining limitations in the claims. The Wang reference lacks a polyelectrolyte with negative fixed charges physically bound in the separating layer. The Chu reference teaches an anionic charge modifying agent bonded to substantially all of the membrane microstructure (see col. 9, lines 15-24). Chu does not teach that the supporting layer is essentially free from polyelectrolyte with negative fixed charges, and since Chu teaches that substantially all of the membrane microstructure has the polyelectrolyte with negative fixed charges, there is no reason or motivation to provide the supporting layer essentially free from polyelectrolyte with negative fixed charges.

Claims 4, 5, 7-9 and 19 would be allowed due to their dependency on claim 1.

Response to Arguments

Applicant's arguments, see pages 18-20, filed December 19, 2011, with respect to claims 1 and 18, have been fully considered and are persuasive. The rejection of claim 1 has been withdrawn.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1778

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
